

# People, Process and Technology Solutions

*To Help Win Souls for Christ*

- Strategic Thought Leadership
- Enterprise System Management
- Centralized Shared Services
  - Proactive Support
- Tools to Help Your Mission

## Shepherd Analytics

How are your missionary efforts working? Are there things you can be doing better? Shepherd Analytics can work with data from the systems you already use to display dynamic charts, key performance indicators and trends. These can be organized into informational dashboards that help you optimize your missionary efforts and reduce busywork to yield more fruitful results.

---

## Shepherd Diocese Manager

What if your efforts to track and maintain clergy assignments, parishes and schools were automatically updated on your diocesan website? Shepherd Diocese Manager helps you maintain and report on clergy, lay personnel, parishes, Mass times, schools and more. This online application allows you to manage and report on all historical clergy assignments and easily publish the active parish, assignment, and place details to your diocesan website. Diocesan staff can then access reports tailored to the needs of their departments and offices.

---

## Shepherd 360°

Do you really know your parishioners? Can you identify and mobilize your missionary disciples? Shepherd 360° is a relationship management system that gives parishes a 360° view of their parishioners. This helps to build relationships in order for parish clergy and staff to accompany people on their faith journey and send them out on mission to bring more souls to Christ.

Features include:

- Parishioner management/ CRM
- Small group management
- Evangelization and outreach
- Faith formation
- Communications (email / SMS)
- Calendaring
- Events
- Reporting, analytics and metrics
- Workflow & process automation
- Shared data across parish functions
